IUGS SERIES A AND B

Proceedings of symposia and of IUGS bodies are published in these Series. IUGS sets the specifications for the format of Series A (240 x 162 mm "congress size") and Series B (297 x 210 mm, A 4 size) and assigns the serial numbers. The volumes however, are not published by IUGS itself, but by different publishing houses. Unfortunately, subscription to the complete series is not possible. The publications are available from the publishers or addresses listed below.

Series A, Number 1:

Westermann, G.E.G. (ed.) SEXUAL DIMORPHISM IN FOSSIL METAZOA AND TAXONOMIC IMPLICATIONS. E. Schweizerbart'sche Verlagsbuchhandlung, Stuttgart, (1969), 251p. stiff cover \$19.80, DM 46.00. Symposium organized by the International Palaeontological Union, Committee on Evolution, Prague, 1968.

Series A, Number 2:

Pouba, Z. and Stempok, M. (eds.) PROBLEMS OF HYDROTHERMAL ORE DEPOSITION. E. Schweizerbart'sche Verlagsbuchhandlung, Stuttgart, (1970), 396p. cloth bound DM 74.00. The origin, evolution and control of ore-forming fluids. Symposium organized by the International Association on the Genesis of Ore Deposits, St. Andrews, Scotland, 1967.

Series A, Number 3:

Amstutz, G.C. and Bernard, A.J. (eds.) ORES IN SEDIMENTS. 2nd edition. Springer-Verlag, Berlin, Heidelberg and New York, (1976), 350p. \$25.60, DM 58.00. VIII International Sedimentological Congress, Heidelberg, August 31-September 3, 1971.

Series A, Number 4:

Amstutz, G.C. (ed.) SPLITES AND SPILITIC ROCKS. Springer-Verlag, Berlin, Heidelberg and New York, (1974), 482p. cloth \$27.10, DM 66.00

Series A, Number 5:

Martinsson, A. (ed.) THE SILURIAN-DEVONIAN BOUNDARY. E. Schweizerbart'sche Verlagsbuchhandlung, Stuttgart, (1977), 349p. stiff cover \$42.20, DM 98.00. Final report of the Committee on the Silurian-Devonian Boundary within IUGS Commission on Stratigraphy and a state of the art report for Project Ecostratigraphy.

Series B, Number 1:

Adie, R.J. (ed.) ANTARCTIC GEOLOGY AND GEOPHYSICS. Universitetsforlaget, Oslo, (1972), 876p. \$78.00, N.Kr. 390.00. Order addresses: Universitetsforlaget, P.O. Box 307, Blindern Oslo 3, Norway, or Box 142, Boston, Mass., 02113, U.S.A., or Global Book Resources, 37 Queen Street, Henley on Thames, Oxon RG9 1AJ, U.K. Proceedings of the 2nd Symposium on Antarctic Geology and Solid Earth Geophysics, held in Oslo, August 6-15, 1970.

Series B, Number 2:

Collins, B.W. and Fraser, R. (eds.) RECENT CRUSTAL MOVEMENTS AND ASSOCIATED SEISMICITY. Royal Society of New Zealand, Bulletin 9, (1971), 247p. NZ \$8.00. Order address: The General Secretary, The Royal Society of New Zealand, P.O. Box 12249, Wellington, New Zealand. Selected papers of the International Symposium on Recent Crustal Movements and Associated Seismicity, held in Wellington in February 1970.

Series B, Number 3:

Burger, A. and Dubertret, L. (eds.) HYDROGEOLOGY OF KARSTIC TERRAINS/HYDROGEOLOGIE DES TERRAINS KARSTIQUES. Published by the International Association of Hydrogeologists, Paris, (1975), 190p. \$20.00. Order address: Dr. E. Groba, Treasurer of IAH, Landesamt für Bodenforschung, Postfach 510153, 3000 Hannover 51, Federal Republic of Germany.

Hedberg, H.D. (ed.) INTERNATIONAL STRATIGRAPHIC GUIDE; A Guide to Stratigraphic Classification, Terminology, and Procedure. IUGS, International Subcommission on Stratigraphic Classification; John Wiley & Sons, Inc., 605 Third Avenue, New York, N.Y. 10016, U.S.A., (1976), 200p.

COAL DEPOSITS

ORIGIN, EVOLUTION, AND PRESENT CHARACTERISTICS

J. H. TATSCH

This is no ordinary book on coal deposits. Nor does it simply detail the locations and gross characteristics of the Earth's coal deposits. Rather, it shows how coal deposits have originated, have evolved, and have become emplaced into their present environments in accordance with a single, long-lived, deep-seated mechanism that has been operating within the Earth during the 4.6 billion years that the Earth is believed to have been in existence, with particular attention to the Carboniferous, Permian, Cretaceous, and Tertiary periods. The mechanism used is the "tectonospheric Earth model," which has been described in the book, **THE EARTH'S TECTONOSPHERE** (1972), and used as the basis for the books, **MINERAL DEPOSITS** (1973), **PETROLEUM DEPOSITS** (1974), **GOLD DEPOSITS** (1975), **COPPER DEPOSITS** (1975), **URANIUM DEPOSITS** (1976), **GEOTHERMAL DEPOSITS** (1976) and **EARTHQUAKES** (1977).

Chapter headings: 1, The origin of coal; 2, The global distribution patterns of coal deposits; 3, The geometrical, mechanical, thermal, and chemical behavior of the Earth during the past 4.6 billion years; 4, Plate tectonics, omniductive processes, and seismotectonomagmatic belts; 5, Precambrian seismotectonomagmatic belts and the associated coal deposits; 6, Paleozoic seismotectonomagmatic belts and the associated coal deposits; 7, Mesozoic seismotectonomagmatic belts and the associated coal deposits; 8, Cenozoic seismotectonomagmatic belts and the associated coal deposits; 9, The present distribution of coal deposits as a function of the Earth's behavior during the past one billion years; 10, The Tectonospheric Earth Model as a supplementary tool in the exploration for coal deposits. Appendix: The Tectonospheric Earth Model: a new concept.

This book, composed almost entirely of proprietary material, summarizes the results of an independent research project undertaken to determine the most probable geometrical, mechanical, thermal, and chemical aspects of the origin, evolution, and present characteristics of the Earth's coal deposits. Because of its proprietary nature, very little of this material has been published in journals. Nor is it expected that very much of it will be offered for publication other than in book form. This approach, we feel, permits the reader to gain a better perspective of the subject matter presented.

May be ordered directly from the address shown below or from book dealers in all parts of the world. Hard cover, 6 x 9 inches, 450 pages. Table of contents, line drawings, index, maps, references. \$156. ISBN:0-912890-13-4. LC:76-28096. 1979. (In press.)
